### SBZ 610/03

Cutting and machining centers

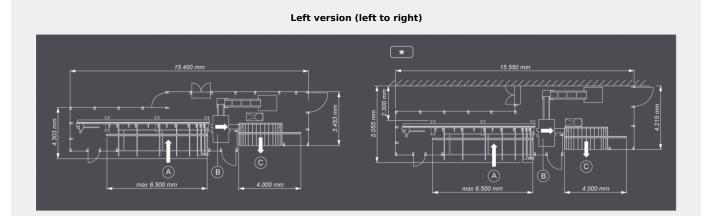

Maximum working speeds with the highest quality are delivered by three cutting units. Automatic cutting centre with three built-in cutting units for cutting profiles to length for window and door manufacturing. Work sequence as needed, either from the left towards the right or the reverse. Infeed with motorised, continuously adjustable gripper. Lifting function for gap-free loading of the feed magazine. Profiles are guided on rollers to ensure gentle treatment of the profile and protective film. Optimised length cutting with no processing waste. Internal gripper avoids damaging the profiles. Integrated measuring sensors for residual piece detection. Outfeed for parts via discharge table. Industrial PC with Windows operating system.
